**Our company is backed by long years of experience in developing innovative, high-quality solutions, and customized systems for the wood finishing industry.**

**We have partnered with reputable manufacturers over the years in bringing these quality finishing solutions to the Philippine market.**

As the world faces the growing challenges of climate change, Le Vernici Italia, Inc. is committed to making our products environmentally-friendly. We are continuously developing wood-finishing solutions through cutting-edge technologies to produce painting solutions that have minimal impact on the environment.

To this end, we have begun introducing UV technology, waterborne, and combination systems as alternatives to solvents to offer our customers environmentally-compliant systems.

*Le Vernici Italia, Inc. is a member of industry associations:*

*Chamber of Furniture Industries of the Philippines, Inc. (CFIP)*

*Philippine Exporters Confederation, Inc. (PHILEXPORT)*

*Pampanga Furniture Industries Foundation, Inc. (PFIF)*

*Cebu Furniture Industries Foundation, Inc. (CFIF)*

## **OUR VISION**

**To provide clean, innovative, cost efficient, and environmentally compliant solutions to our customers to make them highly competitive in securing projects.**

## **OUR MISSION**

To source, develop, and provide our customers with top quality, technologically advanced, and environmentally compliant solutions for the wood working and allied industries at competitive costs to support our customers in achieving their goals of delivering high quality projects to their clients.

To enhance the professional and technical advancement of our staff so they can provide the best customer care and technical support to our customers.

To contribute to the upliftment of wood finishing industry through active participation in professional organizations and initiatives.

## **OUR VALUES**

**Excellence through innovations.**

**Best customer care through highly skilled technical support.**

**Business integrity through staff training and development.**

## Product Lines

<b>NITROCELLULOSE LACQUERS</b>	Single pack lacquers which consist of nitrocellulose binder, alkyd and solvents; easy to use, apply, repair, and polish.
<b>CLEAR SEALERS</b>	Seals the wood and the colorants in between coats.
<b>PIGMENTED SEALERS</b>	In various colors, seal the wood in between the coats.
<b>CLEAR TOPCOATS</b>	Give the final protection and define the shine, gloss, and clarity of the finish.
<b>PIGMENTED TOPCOATS</b>	In various colors, give the final protection of the finish.
<b>POLYURETHANE LACQUERS</b>	Two-pack lacquer which consist of reactive acrylics, isocyanates, and solvents with high finish and chemical resistance.
<b>ACRYLIC LACQUERS</b>	Two-pack acrylic lacquer used for a non-yellowing finish.
<b>FLOOR COATINGS</b>	Tough, protective layers used in applications where heavy surface wear or corrosion is expected.
<b>OUTDOOR COATINGS</b>	Lacquers that provide protection from moisture since they are exposed to various weather conditions.
<b>HARDENER FOR PU LACQUERS</b>	Used in mixing ratio with PU based products to serve as crosslinkers.
<b>WATERBORNE LACQUERS</b>	Consist of acrylics/urethane dispersions and water, are easy to apply, and are environmentally friendly.

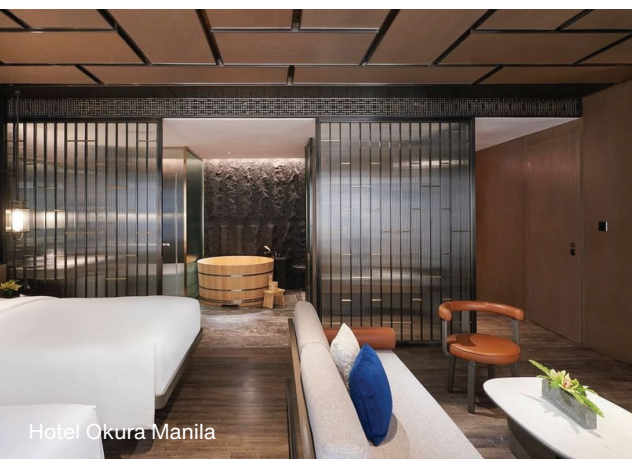

<b>CLEAR MULTI-COATS</b>	Could be used as sealers and topcoats at the same time; 3 coats of the said products are already a complete system.
<b>TINTING COLORS FOR VARIOUS LACQUERS</b>	Tinting colors for various lacquers
<b>STAINS</b>	Seal off the pores in wood, preventing it from taking water; aside from adding color, stains may also add a layer of protection from the sun's UV rays that may minimize or prevent discoloration.
<b>AQUASOL STAINS</b>	Concentrated stains that can be diluted with water as solvent.
<b>READY-TO-SPRAY STAINS</b>	Formulated/color matched based on customer requirements.
<b>GLAZES</b>	Oil based stains for creating antique effect.
<b>VINYL LACQUERS</b>	Single pack vinyl resins with excellent adhesion, good flow, fast sanding time, and short re-coating time specially designed for difficult substrate surfaces, metal, and wooden furniture.
<b>BUTYRATE LACQUERS</b>	Single component products with similar properties to NC products but based on cellulose acetate butyrate (CAB), thermoplastic acrylic and plasticizer for excellent non-yellowing property.
<b>GLASS COATINGS</b>	Two-pack lacquers used in the back painting of glass; are easy to apply, and have good adhesion properties.
<b>UV CURING</b>	Durable and protective coating that cures under ultraviolet light.
<b>GLUE AND ADHESIVES</b>	Non-metallic substances that are capable of holding materials together in a functional manner by surface attachment that resists separation. Examples are: PVAC White Glue, Powder Glue, Hot Melt, and Sprayable Contact Adhesive.
<b>BALANCING PAPER</b>	Made from natural fibers, conifers and deciduous and are used to prevent distortion or damage due to excess moisture; they remove irregularities, seal the surface, and provide a substrate for painting.
<b>SPRAY EQUIPMENT</b>	Used to apply paint or staining to surfaces such as wood or metal.
<b>ALLIED PRODUCTS</b>
